DETAILED ACTION

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Art Unit: 3627

The inventions are distinct, each from the other because:

Inventions I-VIII and VIII-I are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention each invention has separate utility such as a method/^{system}~~stem~~ for controlling a switch using a data bundle with a specific operational command. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication should be directed to PRIMARY EXAMINER Joseph A. Fischetti at telephone number (703) 305-0731.
